**United States Department of the Interior  
Minerals Management Service  
Summer Intern (Petroleum Engineering Technician), GS-4**

---

*MMS is looking for energetic and talented college students to participate in the 2007 summer intern program. Selected students will have an opportunity to become part of this dynamic organization that manages the energy and mineral resources on the Outer Continental Shelf.*

**Posting Number:** SEEP-07-02 (multiple vacancies)

**Opens:** 10/02/06 **Closes:** 10/27/06

**Duty Location:** Vacancies are located in New Orleans, Houma, Lafayette, and Lake Charles, LA (**Indicate preference**)

**Duration of Employment:** Summer Only **Hours:** Fulltime

**Housing:** Stipend is available for students who live outside of the commuting area.

**Rate of Pay:** \$12.14 per hour

---

**Requirements:**

- Must be able to work 40 hours per week.
- Six months general experience **and** six months specialized engineering experience **or** completion of two years above high school with course work related to engineering **or** a combination of education and experience. **For some positions, applicants will be required to pass a medical exam.**
- Students must be enrolled in or been accepted for enrollment on at least a half-time basis as determined by the school's criteria. **Students are not required to attend school during summer employment.**
- Please be sure to submit a complete resume detailing your work experience, dates of employment (specify number of hours worked), education, educational level and number of hours completed, applicable engineering courses, and expected graduation date by the closing date.
- **Please include vacancy posting number on your resume.**

**What Is MMS?**

- The Minerals Management Service (MMS), a bureau in the U.S. Department of the Interior, is the Federal agency that manages the nation's natural gas, oil and other mineral resources on the outer continental shelf (OCS). The agency also collects, accounts for and disburses more than \$8 billion per year in revenues from Federal offshore mineral leases and from onshore mineral leases on Federal and Indian lands. The program is national in scope and headquartered in Washington, D.C. It includes two major programs, Offshore Minerals Management and Minerals Revenue Management.
- **Duties:** Multiple Vacancies:
  - Field Operations Department.** Engineers are responsible for ensuring that offshore OCS operations are performed in a safe and environmentally sound manner. This is accomplished through two main programs: a rigorous planning, permitting, and reporting program; and an inspection, investigation and enforcement program.
  - Production and Development Department.** Engineers perform duties that are focused on the conservation of natural resources, prevention of hydrocarbon waste, and/or the protection of correlative rights including Federal royalty interests.
  - Resource Evaluation Department.** Engineers complete oil and gas field studies through the analysis, evaluation, and interpretation of reservoir engineering data and geological and geophysical information to estimate the volume of hydrocarbon reserves and resources of the Federal outer continental shelf.

**For more information about the Student Educational Employment Program go to:**
